Judging Arrow Values

It is vital that you meet the problem in a proper way

- (a) Always use your magnifying glass
- (b) Always view the arrow from both sides – once
- (c) Always view the arrow from a position close to right angles (90 degrees) as possible.
- (d) Always try to avoid touching the face or arrows.
- (e) Always give a clear value of the arrow.
- (f) Always check that your called value is scored.
