# Changing Target Archery Timing
Chronotir

Old controller on left, newer version on right, buttons are the same

1: Turn on

2: Hold down the PR (Programme Button until shoot time flashes

3: Tap the up arrow until the time increases to 180s (seconds)

4: OR tap the down arrow until the time decreased to 90s (seconds)

4: Tap PR to check Pre-shoot (10 seconds) and again to see Amber (30 seconds)

4: HOLD DOWN PR to exit programming mode

5: If using double detail use the Down arrow to cycle through AB/CD etc (only shows on timing clocks, not on the controller
